Dec	7,700	160,956	•	2,726	216,794

Note: End of period. The annual figures are from the annual accounts of Danmarks Nationalbank. The monthly figures – also at end-December – are from the monthly balance sheets.

As from the 2004 annual accounts, Danmarks Nationalbank's annual and monthly balance sheets are published with monetary-policy lending and deposits listed as separate balance-sheet items, whereas previously they were included under "Lending", "Deposits" and "Certificates of deposit". Moreover, as from the 2004 annual accounts, current accounts, retail clearing accounts and securities settlement accounts in kroner are included in net terms. Previously, these were included in gross terms under "Lending" and "Deposits". For more information on the balance-sheet changes, see also Danmarks Nationalbank, *Report and Accounts*, 2004, p. 124.

The use of the monetary-policy instruments is specified in Table 4.

¹ Gold is stated at the market value at year-end.

² Danmarks Nationalbank's accounts with the International Monetary Fund are specified in Table 9. In the period end-2001 to December 2006 including lending to the Poverty Reduction and Growth Facility Trust.

³ Including shares and tangible fixed assets as from 2001, when these were capitalised, cf. Danmarks Nationalbank, *Report and Accounts*, 2001, p. 116.

⁴ Up to and including December 2004 the figures show only certificates of deposit.

Note: End of period. The annual figures are from the annual accounts of Danmarks Nationalbank. The monthly figures – also at end-December – are from the monthly balance sheets.

In 1999 the group of monetary-policy counterparties was expanded to include mortgage-credit institutes. Before 1999 the statistics solely include banks.

¹ Nominal value.

² The monetary-policy counterparties' net current-account balances in Danish kroner at the close of the monetary-policy day.

³ Loans against collateral. Up to 20 June 1999 including repurchase agreements.

Note: End of period. The money stock is calculated in accordance with the ECB's definition of harmonised monetary aggregates for the EU: M1, M2 and M3. This includes residents' short-term deposits with MFIs in kroner and foreign currencies. Special deposit schemes are included in the money stock (M2 and M3) to the extent that they are within the short-term band. Bonds issued with an original maturity of up to and including 2 years, money-market papers and shares issued by MFIs are included in M3. The money stock is calculated on the basis of the consolidated balance sheet of the MFI sector and represents the MFI sector's liquid liabilities vis-à-vis the money-holding sectors – i.e. citizens and companies, but excluding the central government and non-residents, who are regarded as money-neutral in this connection.

The M1 monetary aggregate is calculated as the sum of "Banknotes and coins" and "Deposits on demand", and the M2 monetary aggregate is calculated as the sum of M1, "Time deposits with an original maturity of ≤ 2 years" and "Deposits at notice with an original maturity ≤ 3 months".

The MFI sector comprises Danish Monetary Financial Institutions, i.e. banks and mortgage-credit institutes, other credit institutions, money-market funds and Danmarks Nationalbank.

¹ Banknotes and coins in circulation, excluding MFI holdings.

Note: Interest rates at year-end or as from the date stated.

¹ Danmarks Nationalbank's interest rates for collateralised lending as well as for sale and repurchase of Danmarks Nationalbank's certificates of deposit. On purchasing certificates of deposit before expiry, Danmarks Nationalbank's buy-back price is normally based on a slightly higher interest rate. The interest rates stated exclude this premium. Until 21 June 1999, Danmarks Nationalbank's lending rate was called the repo rate.

THE OFFICIAL INTEREST RATES OF THE EUROPEAN CENTRAL BANK
